PHILOSOPHICAL MAGAZINE B, 1998, VOL. 78, NOS. 5/6, 675–677

SUBJECT INDEX

Vol. 78

PAGE

Adiabatic equation for cracks . . . 203
Alloyed surface magnets, spin-flip energy . . . 603
Amorphous Se, ring-to-chain conversion . . . 94
Angular-resolved photoemission, real-space calculation . . . 503
Appearance potential spectroscopy on overlayers . . . 497

Bandgap light on amorphous chalcongenides . . . 94
Borders of soap films . . . 1

Co/Cu and Ni/Cu(100) interlayer exchange . . . 557
Co/(Cu,*M*)/Co(001) trilayers, *M* = Zn, Au, Ni . . . 571
Co-island growth on Pt . . . 103
$Co_{0.5}Pt_{0.5}$, fcc, magnetocrystalline anisotropy . . . 611
Complex fluid instabilities . . . 131
Constrained local moment model for spin dynamics . . . 665
Couette–Taylor flow of a polymer solution . . . 253
Cr–Fe surface alloy on Fe substrate, calculated properties . . . 637
Cr growth on Fe(001) . . . 643
Crack dynamics in elastic media . . . 97
Crack propagation in strips . . . 203
Cu_3Ni_3 multilayers embedded in Cu(100) . . . 549

Deformation on thin elastic shells . . . 225
Diamond type-Ia, defects . . . 299
Diffusion in semiconductors . . . 79
Dislocation interaction, modelling . . . 155
Dislocation moving under Lorentz force . . . 177
Dislocation in finite samples . . . 109
DNA polymer relaxation . . . 171
Domain wall resistivity in diffuse ferromagnets . . . 545

Elastic fields in dislocations . . . 109
Electronic and optical properties by LMTO . . . 475
EPR and electrical conductivity of V glasses . . . 265
Equation of motion of a crack . . . 97
Extended Hubbard model for $D > 1$ dimensions . . . 327

FeCo/Mn superlattices, non-collinear, band structure . . . 623
$(Fe,Co)_n$/Cu(100) properties . . . 597, 603
FeCu 'superlattices' on Cu(100), magnetic properties . . . 591
Fe/Cu(001) overlayers, spin spectroscopy . . . 497
$Fe_{3-x}Mn_xSi$ Heusler alloys, spin ordering . . . 629
Fe/(Mo,Re)/Fe, (100) and (110) exchange coupling . . . 565
Fermi liquid versus superconductivity competition . . . 365
FeS_2 and CoS_2 electronic and optical properties . . . 475
Film vibrations . . . 115
Films bonded to solids, failure . . . 143

Fingering and fracture in viscoelastic materials . . . 191
Fingering in polymer and surfactant solutions . . . 131
First principles spin dynamics . . . 665
Foam-like evolution in polycrystalline systems . . . 397
Forces and lattice relaxation in alloys, KKR method . . . 429
Föppl–von Karman equations for buckling . . . 235

Gd magnetic circular dichroism, L edges . . . 527
Grain size effects in ice . . . 375
Grain growth effects in melt and growth cycles . . . 397
Grain-growth simulation in two dimensions . . . 329

Heisenberg parameters in thin magnetic films . . . 617
Hele–Shaw cell flow perturbations . . . 191
Hele–Shaw flow with surface tension . . . 159
Hubbard exact solutions . . . 315

Ice, coexistence of cubic and hexagonal . . . 375
Immiscible fluid dynamics . . . 159
Impurity magnetic properties in magnetic multilayers . . . 537
Inertial instability in polymer flow . . . 253
Instabilities in dislocation interaction . . . 155
Instability of cracks in thin brittle plates . . . 177
Interlayer exchange coupling, temperature and disorder . . . 571
Interlayer, exchange coupling, theory . . . 557, 565

KKR, self-consistent screened . . . 411

Langmuir–Blodgett film structure . . . 53
Light transmittance in fibre-reinforced composites . . . 37
$LiMn_2O_4$, electrical transport . . . 65
Li–O bonds in $LiXO_3$-type crystals . . . 29

Magnetic anisotropy of thin films by TB-LMTO . . . 457, 637
Magnetic properties of surfaces, interfaces, and multilayers, *ab initio* calculations—proceedings . . . 409–675
Microbranching instability in dynamic fracture . . . 243
Mn/Ag(100) surface alloy formation . . . 659
Mullins–Sekerka theory at nematic–isotropic front . . . 167
Multilayer systems by SKKR-SGF method . . . 423
Multilayer systems, magnetic moments and anisotropy . . . 597

Natural and man-made platelet defects in diamond . . . 299
Ni magnetic properties, screened real-space study . . . 449
Ni on Cu(001), magnetic structure and anisotropy . . . 585
Ni surface, hyperfine fields of probe atoms . . . 435
Non-collinear magnetism by locally Green's functions . . . 481
Non-collinear magnetism in real-space representation . . . 463
Nonlinear optical coefficients, second order . . . 29

Oscillatory exchange coupling across alloy spacers . . . 577

p-Type semiconductors with metallic ions . . . 79
Pattern formation at liquid crystal interface . . . 167
Pattern formation in thin-film failure . . . 143
Particle-antiparticle pairs in a dissipative medium . . . 13
$Pb(Zn_{1/3}Nb_{2/3})O_3$–$PbTiO_3$–$BaTiO_3$ dielectric properties . . . 279
Phthalocyanine films . . . 53

Ping-pong ball contact and compression . . . 225
PMMA and soda-lime glass cracking . . . 243
Polymer concentration changes from flow . . . 215

Quasidendritic growth due to elastic fields . . . 103

Relaxation of ideal polymer networks . . . 171
Relaxation of interfaces, KKR calculation . . . 423
Resistivity and GMR in Cu_3Ni_3 in Cu multilayers . . . 549

Scanning tunnelling microscopy, tip electronic structure . . . 519
Screening in one dimension by LMTO and KKR . . . 441
Short-range order effect on magnetic anisotropy . . . 611
Silver and gold nanoclusters, photoabsorption . . . 385
SiO_2 fibres in epoxy . . . 37
Size effect in UV resonances . . . 385
Small polarons on Mn^{3+} . . . 65
Soap films under drainage . . . 1
Spin-polarized X-ray emission for disordered systems . . . 513
STM tip atoms' effect . . . 519
Superconducting instability in periodic Anderson lattice . . . 365
Superconducting polymers . . . 353
Superconductivity theory of single-electron carrier . . . 295
Steps on transition-metal surfaces, energetics . . . 487
Stress relief in films . . . 143

Theoretical anisotropy of strength of intermetallics, metals . . . 653
Thin plate buckling . . . 235
Total energy calculations for Al, Ni, Fe, and Cu . . . 417
Two-dimensional crystal breakage at an interface . . . 221

V polarization at Fe interface in Fe_nV_m superlattices . . . 469
V_2O_5–$ZnCl_2$–TeO_2 glasses . . . 265
Vacuum instability . . . 13
Vertex dynamics simulation of grain growth . . . 329
Vibrations of smectic films . . . 115

PHILOSOPHICAL MAGAZINE B, 1998, VOL. 78, NOS. 5/6, 679–685

INDEX OF AUTHORS
